Unit 2 · Session 2 · SLO 2 — Solved Worksheet

Name: DEEP SAND DEEP SAND | **Reg. No:** RA2511026010557

Unit â€“ 2 : Session â€“ 2 : SLO â€“ 2 | Traversal and Searching in an Array

I. Pseudocode â€” Array Traversal

• Step 1: [INITIALIZATION] SET I = 1 (or 0 in C indexing)
• Step 2: Repeat Steps 3 to 4 while I <= N
• Step 3: Apply Process to A[I]
• Step 4: SET I = I + 1
• [END OF LOOP]
• Step 5: EXIT

II. Fill in the Blanks

1. loop â€” a loop (typically for) accesses each element.
2. 0 â€” traversal typically starts at index 0.
3. n â^' 1 â€” the last index of an n-element array.
4. bounds â€ — never let the index go out of bounds.
5. n â^' 1 â€ — reverse traversal starts from the last index, n â^' 1.
