Data Structures and Algorithms · 21CSC201J

Unit 1 · Session 3 · SLO 2 — Solved Worksheet

Name: DEEP SAND DEEP SAND | **Reg. No:** RA2511026010557

Unit â€“ 1 : Session â€“ 3 : SLO â€“ 2 | Implementation of Structures in C â€” Match the Following

I. Match the Following

1. struct keyword â€” O. Used to define a structure.
2. Dot operator (.) â€” K. var.member.
3. Structure variable declaration â€” T. After structure definition.
4. Member access â€” M. Access structure members.
5. Structure with array â€” A. Structure array.
6. Pointer to structure â€” R. struct *ptr;.
7. Arrow operator (->) â€” S. Member access via pointer.
8. Nested structure â€” N. Structure inside structure.
9. Structure parameter passing â€” L. Pass by value.
10. Structure with function â€” Q. Can return a structure.
11. typedef â€” D. Define custom type name.
12. Structure size â€” I. Sum of all members (aligned).
13. Enum with structure â€” H. Valid declaration.
14. Array inside structure â€” B. Allowed in structure.
15. Structure inside array â€” P. struct Student s[5];.
16. Self-referential structure â€” E. Points to same type.
17. Structure initialization â€” J. = { val1, val2 }.
18. Dynamic structure allocation â€” F. malloc(sizeof(struct)).
19. sizeof with structure â€” G. Gives memory size.
20. Structure copy â€” C. Allowed with = operator.
